IEG PI NOTICE

No. 7-77

TITLE/SIGNIFICANCE:

Possible New Truck-Mounted Radar

COMMENT: The radar sail

25X1

25X1

The antenna is mounted behind the cab and appears to be centered on the vehicle. This is the first radar of its type we have identified in China. The function of the mobile radar has not been determined, but it is a good candidate as the acquisition radar for the new mobile CSA-X-2 system.
